

**December 2023**

**B. Tech. (CE(DS)) 3rd Semester**

**Mathematics for Data Science (BSC-DS-301)**

Time : 3 Hours]

[Max. Marks : 75

*Instructions :*

1. *It is compulsory to answer all the questions (1.5 marks each) of Part-A in short.*
2. *Answer any four questions from Part-B in detail.*
3. *Different sub-parts of a question are to be attempted adjacent to each other.*
4. *Symbols used In this paper have their usual meanings.*

**PART-A**

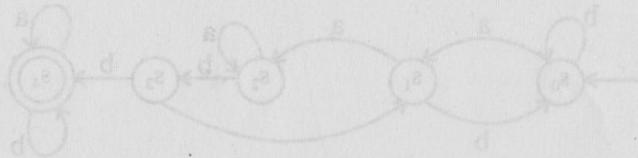

1. (a) Determine the number of four-digit decimal numbers if repetition of digits is not allowed. (1.5)
- (b) Let  $\mathbb{Z}$  be a set of all integers. Then prove that (1.5)  
 $\mathbb{R} = \{(a, b) : a \in \mathbb{Z}; (a-b) \text{ is an even integer}\}$   
 is an equivalence relation on  $\mathbb{Z}$ .
- (c) Define regular expressions. (1.5)
- (d) Define a Language L over a finite set of symbols. (1.5)
- (e) Define degree of the vertex in a Graph G. (1.5)
- (f) If G is a finite group, then prove that for any element  $a \in G$ ,  $a^{O(G)} = e$ . (1.5)

(a) Using generating function method, find the total solution of the difference equation  $a_n - 4a_{n-1} = 6 \cdot 4^n$ . (8)

(b) Prove that a non-empty subset H of a group G is a subgroup of G if and only if  $a, b \in H$  implies  $ab^{-1} \in H$ . (7)

(a) Find the Language L(G) generated by the grammar G, with variables  $\alpha, A, B; T = \{a, b\}$  and productions  $P = \{\alpha \rightarrow \alpha B, B \rightarrow \alpha, B \rightarrow \beta A \text{ and } A \rightarrow \alpha B\}$ . (8)

(b) Define Language determined by a Finite state Automaton and Find the language accepted by the automaton M shown in the transition diagram below. (7)

(a) Find first five iterations of the bisection method to find the smallest positive root of the equation (8)  
 $x^3 - 2x + 1 = 0$

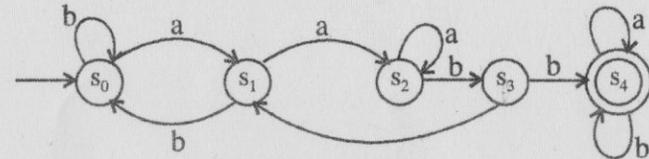

(b) Find first four iterations of the Newton-Raphson method to find the smallest positive root of the equation  $x^3 - 17 = 0$ , with the initial approximation  $x_0 = 2$ . (7)

- (g) Explain Normal subgroup with an example. (1.5)
- (h) Define Lattice. (1.5)
- (i) Explain Regula Falsi Method. (1.5)
- (j) Evaluate  $\int_0^1 x^2 dx$ , using Trapezoidal's rule. (1.5)

### PART-B

2. (a) Let  $n$  be a positive integer and  $D_n$  denotes the set of all divisors of  $n$ . Considering the partial order as divisibility on  $D_n$ , draw Hass diagram for  $D_{28}$ ,  $D_{50}$  and  $D_{36}$ . (7)
- (b) Prove that the set of natural numbers with the order relation of divisibility is a partially ordered set. (8)
3. (a) (i) Does there exist a Graph with 8 Vertices with degrees 2,2,3,6,5,7,8,4? Draw such a Graph or explain why it doesn't exist? (8)
- (ii) Define spanning tree for a Graph  $G$  and also explain directed graph. (8)
- (b) If  $G$  is a planar graph with  $e$  edges,  $v$  vertices and  $r$  regions, then prove that (7)
- $$v - e + r = 2.$$
4. (a) State and prove Langrange's Theorem, (8)
- (b) Construct a truth table for the statement of the form :  $(p \wedge q) \vee \sim r$ , where  $p$ ,  $q$  and  $r$  are any propositions and the symbol  $\sim r$  denotes the negation of  $r$ . (7)

- (a) Using generating function method, find the total solution of the difference equation  $a_n - 4a_{n-1} = 6 \cdot 4^n$ . (8)
- (b) Prove that a non-empty subset  $H$  of a group  $G$  is a subgroup of  $G$  if and only if  $a, b \in H$  implies  $ab^{-1} \in H$ . (7)
6. (a) Find the Language  $L(G)$  generated by the grammar  $G$ , with variables  $\sigma, A, B$ ;  $T = \{a, b\}$  and productions  $P = \{\sigma \rightarrow aB, B \rightarrow b, B \rightarrow bA \text{ and } A \rightarrow aB\}$ . (8)
- (b) Define Language determined by a Finite state Automation and Find the language accepted by the automation  $M$  shown in the transition diagram below: (7)

7. (a) Find first five iterations of the bisection method to find the smallest positive root of the equation (8)
- $$x^3 - 5x + 1 = 0.$$
- (b) Find first four iterations of the Newton-Raphson method to find the smallest positive root of the equation  $x^3 - 17 = 0$ , with the initial approximation  $x_0 = 2$ . (7)
